

*Soft is the warm mittens on a cold winter day, the curl up on the couch and read the paper pajamas.*

The universal language of soft

*You could even try using it on things like curtains, comforters and soccer uniforms, as long as they are made of these materials.*

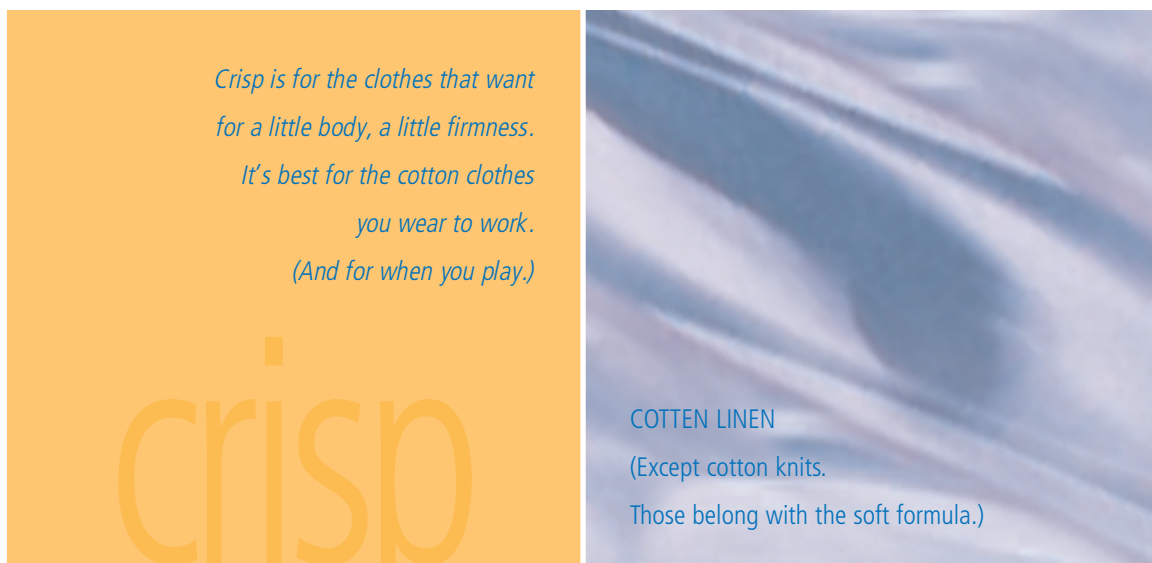

*Soft. For things that flow.  
The non-crisp in the closets and drawers.*  
CHIFFON & LACE  
COTTON BLENDS  
COTTON KNITS  
DENIM  
KNITS  
POLYESTER  
RAYON  
SILK  
VELVET & VELOUR  
WOOL

Find more about Soft at [presiva.com](http://presiva.com)

*Crisp is as Crisp does.  
It'll make you strut down the hallway a little more than usual.  
Crisp is for your cottons.  
We designed it specifically for them because so many clothes people wear today are cotton.*

Crisp and the art of looking good

*Crisp is for the clothes that want for a little body, a little firmness.  
It's best for the cotton clothes you wear to work.  
(And for when you play.)*

COTTEN LINEN  
(Except cotton knits.  
Those belong with the soft formula.)

# Presiva

A ready-to-wear world that always smells fresh.

*We've spent the last 5 years testing thousands of items with Presiva. Our team has learned a great deal about what fabrics work best with Presiva. We've compiled our findings for you in this personal user guide, which provides you with facts and tips on using the unique Presiva fabric care system.*

*Since we're constantly trying to improve Presiva, we'll pass along what we learn with new cards to put in your booklet. Keep an eye out for new cards coming to you soon.*

*Be sure to check out [Presiva.com](http://Presiva.com) for further information.*

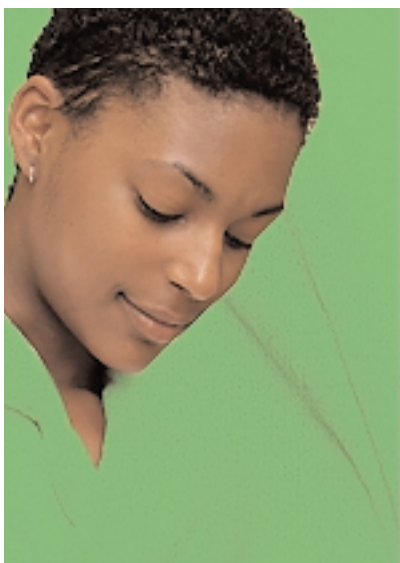

*Presiva.com was created specifically for you, the Personal Valet owner. You'll find everything from special offers to the Presiva Pro Panel. The Pro Panel was set up for you to share your experiences with other Presiva users as well as the people who developed it.*

*We've enclosed note cards in this booklet so you can write down useful information while visiting [Presiva.com](http://Presiva.com). Sign on today!*

## Presiva Pro Panel

Join the Presiva Pro Panel  
and become an expert at [presiva.com](http://presiva.com)

*This is how Presiva actually works. It's a heat-activated formula that penetrates the fibers of your clothing, taking away odors, and de-wrinkling clothes by bending fibers back to their correct shape. The formula is dispensed as needed, so you just need to refill the Personal Valet Presiva container when it gets low.*

*You'll find all the specifics in the Personal Valet Use & Care Guide that came with the machine, or on the door of your Personal Valet.*
